

Local School Wellness Council News

Hello Local School Wellness Teams!

As we continue to progress towards becoming healthier schools, I'd like to highlight some topics that may be useful.

Milestones

Our next milestones include: (1) Initial draft of your Action plan and budget, and (2) Mid-term report. These documents need to be shared with the School Wellness Coordinator and the Director of Student Wellness Initiatives by **December 15th**, and can be accessed using the following link: https://drive.google.com/drive/folders/1x_HR8Tlsy1sn6BA8u3LfZmMVniSKNoQr

Grant Funds

Grant funds should be used to support sustainable goals and your action plan. Once your action plan and budget are submitted you will then complete a purchasing request to the MCPS-Financial Management System (FMS). An automatic request will be sent to the department of Wellness Initiatives and your school will be notified of the approval.

Wellness Goals and Your School Improvement Plan

When choosing your goals think about sustainability. Will your efforts result in lasting change to your school environment? Is there a way you align your wellness goals with those of your school improvement plan?

Tips to Keep Your Committee Active and Effective

- Create a vision and goals that support the MCPS's health and wellness regulation, your school improvement plan (SIP), and your committee interests.
- Divide duties and action items so that all members feel utilized and part of the group.
- Keep the priorities developed in your action plan connected to those interests that may be more specific to their roles and experiences. This will keep members engaged in the work.
- Discuss as a group the best ways to keep everyone informed. Consider implementing a shared folder where you can save your action plan, agendas and keep the group focused on the wellness goals you have identified.
- Breaking into smaller task teams will enable the committee to get more done and can also help engage additional people.

More information on committees can be found at:

Wellness News from MCPS

Teaching and learning through movement

Erin Del Balzo's Kindergarten class at William B. Gibbs is a great example of a kinesthetic

classroom. Allowing students to move around the room makes a huge difference in their ability to retain information and stay on task. According to the Center for Disease Control (CDC, 2015), the average child needs at least 60 minutes of physical activity a day. Students need to exercise in order to remain emotionally, mentally, and physically well. Examples of flexible seating include: pillows, bath mats, wobble chairs, desk cycles, yoga stability balls, crates etc.

Girls on the Run is a nonprofit organization. Over 600 dedicated volunteer coaches led their teams through the past 10 weeks of lessons that finished with a 5K race. Over 2200 girls participated on 127 teams throughout Montgomery County this past season. The organization was able to provide over \$78,000 in need-based financial assistance to families in Montgomery County. The spring 2018 season will begin the week of March 12th.

Committees that work!

Congratulations to John Jeffries and Erin Del Bazo, Wellness Champions at Gibbs E.S, for doing a fantastic job of incorporating wellness material in their school's website. Here's a link for those who are interested in seeing John's work:
