

COVID-19 & AIRBORNE PATHOGEN DEFENSE

PRESENTED BY JASON ANTHONY, CHW TRAINER CONSULTANT

<https://bit.ly/3sILBPS>

REGISTER

Learn how to:

- Distinguish between common airborne pathogens
- Describe the importance of sterilization in managing airborne pathogen transmission
- Use various strategies to prevent infection by airborne pathogens
- Explain how to use personal protective equipment (PPE) to reduce transmission of airborne pathogens

Sept. 26, 1-2 p.m.

It is crucial to take necessary precautions to safeguard community health workers (CHWs) from airborne pathogens at work. These precautions include utilizing PPE, maintaining proper sterilization, and adhering to social distancing guidelines. We will discuss several airborne diseases, such as COVID-19, respiratory syncytial virus (RSV), influenza, and pertussis (whooping cough), and their essential components for airborne precautions.

This training is supported by the Centers for Disease Control and Prevention (CDC), together with the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of awards totaling \$4,339,895 and \$3,000,000, respectively, with 0% financed with non-governmental sources. The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement, by CDC, HRSA, HHS, or the U.S. Government.
