

VACCINE HESITANCY

<https://bit.ly/3PsBjwf>

REGISTER

Learn how to:

- List various factors that contribute to vaccine hesitancy
- Explain the impact of misinformation, social media, and political agendas on vaccine hesitancy
- Use communication techniques to counter vaccine hesitancy with clients

Dec. 5, 6 - 8 pm

Despite a long history of safe vaccination services, the mistrust or refusal of vaccination still exists. In this course, participants will discuss vaccine hesitancy's complexity and context-specific nature and how it can vary across time, place, and vaccines. Other factors include misinformation, social media, and political agendas. This course will prepare community health workers (CHWs) with strategies to counter vaccine hesitancy.

This training is supported by the Centers for Disease Control and Prevention (CDC), together with the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of awards totaling \$4,339,895 and \$3,000,000, respectively, with 0% financed with non-governmental sources. The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement, by CDC, HRSA, HHS, or the U.S. Government.
