

SITUATIONAL AWARENESS

<https://bit.ly/3OP4xoO>

REGISTER

Learn how to:

- Assess risks from all angles
- How to deploy signaling devices and signage
- Stay vigilant and practice prediction in risky situations
- Identify community entry and exit points
- Communicate with others and recognize behaviors

Feb. 20 | 6-8 P.M.

This course is designed to equip community health workers (CHWs) with the skills to maintain maximum situational awareness while working in the field. Situational awareness (SA) is the ability to comprehend and adapt to one's environment, understanding its elements and how they evolve. By enhancing their situational awareness, CHWs can make informed and effective decisions, enabling them to navigate various environments and circumstances confidently and effectively.

This training is supported by the Centers for Disease Control and Prevention (CDC), together with the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) as part of awards totaling \$4,339,895 and \$3,000,000, respectively, with 0% financed with non-governmental sources. The contents are those of the author(s) and do not necessarily represent the official views of, nor an endorsement, by CDC, HRSA, HHS, or the U.S. Government. For more information, please visit CDC.gov and HRSA.gov.
